Professional Summary

Full Stack Developer & Technical Lead with 2+ years delivering 13+ production applications. Expert in scalable Next.js architectures, AI-driven development processes, and React Native app development with AI-powered features. Proven leadership optimising workflows and driving technical excellence.

Technical Skills

Frontend: React.js, React-native, Next.js 14, TypeScript, JavaScript, HTML5, CSS3, TailwindCSS, GSAP, Framer Motion, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Authentication Systems, Payment Gateway Integration, AWS Lambda

Databases & Cloud: MongoDB, PostgreSQL, Firebase, Supabase (Auth, Edge Functions), Appwrite, Vercel, CI/CD Pipelines

Tools & Practices: Git/GitHub, UI/UX Collaboration, Postman

Experience

Technical Lead

Indiefluence, VPS Ventures | Kurukshetra, Haryana

September 2025 – Present

- Leading technical architecture and strategic planning for multiple full-stack projects, overseeing the end-to-end development lifecycle from requirement analysis to production deployment
- Driving team productivity and code quality through technical mentorship, code reviews, and implementation of best practices across React/Next.js ecosystem
- Making critical technology decisions for project scalability, performance optimisation, and cost-effective infrastructure solutions
- Collaborating with stakeholders to define technical roadmaps, sprint planning, and delivery timelines, ensuring alignment with business objectives

Full Stack Developer & Team Lead

Indiefluence, VPS Ventures | Kurukshetra, Haryana

May 2024 – August 2025

- Led cross-functional team of 5+ developers across 13+ production projects, coordinating with UI/UX designers to deliver scalable, client-focused applications on schedule
- Reduced development time by 25% through workflow optimisation, standardised coding practices, and strategic tool selection (Supabase, Appwrite), tailored to project requirements

- Architected and deployed full-stack solutions, translating complex client requirements into technical specifications, achieving 20% faster delivery cycles and measurable client satisfaction improvements
 - Cut backend operational costs by 30% by researching and implementing BaaS platforms (Supabase, Appwrite) over traditional server infrastructure
 - Mentored junior developers on React/Next.js best practices, code reviews, and Git workflows, fostering team skill development and code quality
-

Projects

Rabbit AutoCare | E-Commerce Platform

rabbitautocare.com

| Next.js, Supabase, TailwindCSS, GSAP

- Engineered a full-featured e-commerce platform with product management, inventory tracking, a coupon system, and secure checkout flows using Next.js 14 and Supabase backend
 - Built a comprehensive admin dashboard with real-time analytics, sales graphs, and stock management interface, enabling efficient business operations
 - Implemented GSAP animations and micro-interactions for enhanced UX, achieving smooth product browsing and 35% improvement in user engagement metrics
 - Integrated Supabase authentication and PostgreSQL database for scalable user management and dynamic product catalogue serving 500+ SKUs
-

BigByte Health | Medical Tourism Platform

bigbytehealth.com

| Next.js, Node.js, MongoDB, TailwindCSS

- Developed an end-to-end medical tourism platform connecting international patients with Indian healthcare providers, including doctor profiles, treatment packages, and tourism planning
 - Architected secure RESTful API with Node.js/Express backend and MongoDB for patient data management, appointment booking, and multi-language content delivery
 - Designed responsive UI with TailwindCSS, ensuring a seamless experience across devices, optimised for users from 10+ countries
 - Implemented robust authentication system and data encryption protocols to comply with healthcare data privacy standards
-

MYRO.bot | Corporate Website (Wall Paint Robot)

myro.bot

| Next.js, Performance Optimisation

- Redesigned and launched the official product website for MYRO automated painting robot, achieving 40% performance improvement through Next.js optimisation and efficient asset loading

- Delivered clean, conversion-focused UX with modern animations and clear CTAs, reducing bounce rate by 30%
 - Currently leading design iteration for 2025-2026 product launch, incorporating user feedback and latest web performance best practices
-

House of Aerawat | Jewellery E-Commerce

houseofaerawat.com

| Next.js, Supabase, TailwindCSS

- Engineered a high-performance e-commerce platform for a premium jewellery brand using Next.js 14 (App Router, SSR) and Supabase (auth, PostgreSQL, real-time), reducing load times by 40% and enabling seamless management of 200+ SKUs
 - Implemented secure user authentication, responsive product grids, and dynamic filtering with Supabase edge functions, driving improved conversion rates through optimised checkout flows
 - Led end-to-end deployment on Vercel with CI/CD pipelines, ensuring 99.9% uptime and mobile-first UX for the regional luxury jewellery market
-

Education

Bachelor of Computer Applications (BCA)

Kurukshetra University | JMIT (Seth Jai Parkash Mukand Lal Institute of Engineering and Technology)

August 2021 – May 2024
